

Project 1

Create a model of a volcano that resembles a real volcano in the U.S.

Project 2

Create a spreadsheet of recent volcanic eruptions. Include the continent, country, date of eruption, and extra information. Do this for 5 eruptions.

Project 3

Create a spelling guessing game activity using popular volcanoes and volcano terms. Be sure to include a hint and answer key.

Project 4

Create a fill in the blank quiz. Include 5-7 questions that give a sentence and a single vocabulary word has been replaced with a blank. Include an answer key.

Project 5

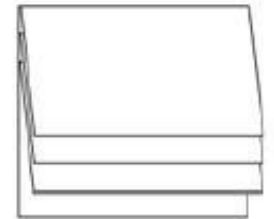

Research one famous volcano. Be able to tell another student about this volcano. When it erupted, where, and what happened after its eruption.

Volcanoes

Project 6

Assemble a foldable using one of the provided templates. Show what you have learned using drawings and explanations. Use color to make the foldable eye-catching.

Project 7

<https://www.youtube.com/watch?v=WgktM2luLok>

Using an index card, write a review about the video. Do you recommend it and why?

Project 8

Focus on how a volcano forms and builds up pressure before erupting. Create a numbered sequence about what happens first, second, third, and so on.

Project 9

Prepare a demonstration to illustrate and explain how a volcano builds up pressure and erupts.

Project 10

Create a 4-square quilt pattern showing 4 different types of volcanoes.
